

## **Water and Sewerage Schemes – Small Communities**

*Adopted - Utilities Committee 11 February 2004*

### **Principles**

1. Sewerage and water need to be funded by the community that benefit
2. Undesirable for sewerage and water to grow in ad hoc fashion subdivision by subdivision
3. That Council will insist that national standards now and in the future, (to the extent it can be foreseen) be satisfied
4. Acknowledge ultimate financial risk of take up of schemes will be borne by community and therefore these need to be carefully assessed
5. That all small communities (as resources permit) will be supported in their consideration of water and sewerage on a similar basis
