Summary of Submission

Amendment sought.

Adopt section 26.2 with amendments as outlined below:

Amend section 26.2 as follows:

The District's most significant known heritage features are represented in the Inventory of Protected Features.

...

Nominations for inclusions, removals or amendments to Categories for individual features will be welcomed from the public, but must contain sufficiently detailed and robust reports in line with assessments that Council use. It is preferable to include ~~They must include~~ the written consent of the owners and;

26.2.1 For heritage precincts and landscapes, a report from an appropriately qualified and experienced conservation / landscape architect is required. These may include site specific reports from government bodies with a remit for heritage, such as Heritage New Zealand Pouhere Taonga and the Department of Conservation.

26.2.2 For sites of significance to Maori, a detailed assessment of the extent of the site and related values must be obtained from the appropriately mandated iwi.

26.2.3 For individual buildings and structures, a report from a suitably qualified conservation architect, using the Council's criteria, and for Category 1 features a Conservation Plan is encouraged. Any Conservation Plan shall be prepared in accordance with Heritage New Zealand's best practice guidelines.

26.2.4 For archaeological sites, a detailed assessment by a suitably qualified and experienced archaeologist.

Summary of Submission

Amend 26.12.7 Glenorchy as follows:

The Glenorchy Heritage Landscape (GHL) is significant for its specific scheelite mining activities ~~that extended from the 1880's until the 1980's which have left a significant group of mine sites and infrastructure, along with a~~ that have produced a sequence of mining evidence that follows the mining cycle which began here in the 1880's and will continue to exist onto the future. These activities have produced a complex of sites along with a unique social history of the people who worked there. They in turn, represent the hard won and sometimes fruitless endeavours of a close knit community of miners that spanned a hundred years of mining at Glenorchy and continues to this day. The GHL encompasses the majority of historic mining locations, tracks, cableway and sections of water races that represented a primary scheelite producing area in New Zealand. The combination of private and state-owned mines is also a unique part of the GHL's history in the ubiquitous and contemporary mining industry within the Queenstown Lakes District. Overall, the scheelite mining symbolised by the GHL is of national heritage significance.

It is recognised in this area that the GHL retains potential for exploration and mining, and it is appropriate to enable mining in such cases.

Summary of Submission Page 145 of the Kai Tahu Ki Otago Natural Resource Management Plan 2005 item 11.11 lists 29

desired outcomes for the protection of sites and areas and could be used as a guideline.

--All names of sites of importance to Maori as identified in the area shown on the Taiaroa Map of 1879/80 (refer to submission for map) in this submission, should be incorporated into the Archaeological Alert Layer 26.3.1.

--Queenstown Lakes District Council and Kai Tahu Ki Otago to get together to educate the contractors and others as outlined, their responsibilities to Council and the law.

--Designated Council officers, as part of their duties, be made responsible for and record that they have done so, brief details of a random inspection and discussion with site foremen or any other person deemed to be in charge of an operation that entails the disturbance of more than 200m³ of topsoil.

--Any find/s to be reported immediately to the relevant authority.

Summary of Submission	MATUKITUKI CULTIVATED AREA/GARDENS
------------------------------	------------------------------------

The area is of approximately 3000 sqm [+ or -] on a hillock a short distance from the river and is accessed by a Department of Conservation track up the left hand side of the Matukituki River from the bridge to West Wanaka Station. A walk of about one hour. The area shows distinct signs of having been cultivated in the past. There are ridges and channelling cut into the ground much akin to potato ridging of today. Significant damage has been effected by the activities of livestock. It may well be that this was/is the place where Te Mohene was caught' by Te Puoho's party as shown on the map drawn by Huruhuru for Shortland in 1844. Te Puoho proceeded to Tukurau where he met his death. His wives composed and sang a moving waiata when they were advised of his demise some time later. The Department of Conservation has fenced part of the hillock under Tenure review.

I recommend
That this site be included in the proposed district plan, Sites of Significance to Maori 26.11

Position: Oppose

Summary of Submission Expresses concern regarding the Discretionary activity status for subdivision and development within Outstanding Natural Landscapes and Outstanding Natural Features; and the change from a proposed non-complying activity status which was indicated in the March 2015 Draft District Plan.

The society seeks that the s32 Landscape Evaluation Report be re-written containing discussion of the costs and benefits associated with the option of residential subdivision and development becoming non-complying versus discretionary. The s32 Landscape Evaluation Report should then be publicly notified with a 40 working day submission period.

Summary of Submission The wording should be changed so that in the High Density Residential Zone the minimum lot size need not apply to any lots being created which contain a residential unit provided that any vacant lots also being created do meet the minimum lot size

Point Number 275.4 **Provision:** 1182-27 Subdivision and Development > 1352-27.9 Rules - Non-notification of Applications

Position: Oppose

Summary of Submission Reject rule 27.9.2a. If the intention of the rule is to ensure that adequate consultation is undertaken with the NZTA then this should be made clear in the rule wording. The proposed wording allows for boundary adjustments and other complying subdivisions to potentially be notified or limited notified for any reason if the land is located next to a state highway, which is unfair to landowners adjoining the highway if such activities in other locations are not required to be notified.

Summary of Submission

Seek the minimum lot size within the Large Lot Residential Zone is reduced from 4000m² to 2000m² as 4000m² is too restrictive and is the same as the minimum lot size for the Rural Residential zone. The creation of the Large Lot Residential Zone provides the opportunity to transition from Rural Residential to Low Density Residential. This would provide for the community's economic and cultural well being.

Summary of Submission	That we generally Support the subdivision rules but the wording '(established meaning a Building Code of Compliance Certificate has been issued)' should be removed. Code of compliance certificates have only been in effect since July 1992. Residential Units constructed earlier will have established residential use but will not have a CCC, others built after July 1992 may only have a certificate of acceptance when consenting authorities were closed down due to not being able to obtain insurance. Using CCC as a means of establishing residential use is not very fair for the above reasons nor even accurate as a building can have a CCC and can be used for something else and may never have residential use established. ie any new commercial building.

Summary of Submission	<p>Neutral / advice.</p> <p>Heritage New Zealand's policy guidance recommends discretionary activity status for the subdivision of land containing a scheduled heritage item (including scheduled archaeological sites). Heritage New Zealand does not usually seek that this same level of subdivision control be applied to all land containing a known archaeological site, as many archaeological sites will not be of sufficient archaeological heritage value to merit such regulation where there are no other</p>		

consent triggers.

Heritage New Zealand's interpretation of the subdivision provisions is that all subdivision activities require resource consent and accordingly the presence of an archaeological site would not, in itself, trigger a requirement for resource consent. In this context Heritage New Zealand is comfortable that the provision 27.5.1.6 is not unduly onerous.

Summary of Submission seeks the following additional objectives and policies (or similar), be included in Chapter 27, to apply to the land identified in Annexure A if its submission for a Rural Lifestyle zoning for that land is accepted:

27.7.21 McDonnell Rural Lifestyle Zoning

Objective 27.7.21.1: Enable subdivision to Rural Lifestyle densities while maintaining the landscape character of the surrounding area.

Policy 27.7.22.1.1 Subdivision shall be undertaken in accordance with a Structure Plan which provides for appropriate setbacks and landscaping to maintain the landscape character of the surrounding area.

Policy 27.7.22.1.2 Require the provision of a Landscape Amenity Management Area to preserve views of the surrounding landscape from public roads while visually softening the appearance of buildings in the zone

Policy 27.7.22.1.3 Avoid linear planting and buildings in the Landscape Amenity Management Area

Summary of Submission Seeks the following additional rules (or similar), be included in Chapter 27, to give effect to the proposed rezoning and the proposed objective and policies:

27.8.10 McDonnell Rural Lifestyle Zoning

27.8.10.1 McDonnell Road Structure Plan – Subdivision failing comply with this rule shall be a discretionary activity.

(a) In the McDonnell Rural Lifestyle Zone, subdivision shall be in general accordance with the Structure Plan located within Part 27.13 of this Chapter. All subdivision shall result in the following: Location of all building platforms within the zone

(b) Location of internal lot boundaries

(c) Access to the zone to be provided from the main entrance to The Hills golf course

(d) Provision of a Landscape Management Plan which details landscape treatment and management within the Landscape Amenity Management Area, and includes the following:

(i) A planting layout plan for the Landscape Amenity Management Area, which includes species and densities of tussocks and naturalised groups of exotic and indigenous trees and shrubs and mowed grass. The purpose of the planting layout shown in the plan is to create a predominately open character;

(ii) Timeframes and sequencing of works;

(iii) Details of the proposed maintenance programme to ensure a survival rate of at least 90% within the first 5 years.

(e) Registration of a consent notice which requires the Landscape Amenity Management Area to be established and maintained by the subdividing owner and/or subsequent owners of any individual allotment on a continuing basis.

Point Number	631.6	Provision:	1182-27 Subdivision and Development > 1253-27.5 Rules - Standards for Subdivision Activities
Position:	Support		

Summary of Submission	The Cassidy Trust supports Rule 27.5: Standards for subdivision activities, as they apply to the rural lifestyle zone, but seeks an amendment to the relevant rule to strike out the second sentence which reads "For the purpose of calculating any average, any allotment greater than four hectares, including the balance, is deemed to be four hectares".		
Point Number	631.7	Provision:	1182-27 Subdivision and Development > 1253-27.5 Rules - Standards for Subdivision Activities > 1254-27.5.1
Position:	Oppose		
Summary of Submission	The Cassidy Trust strongly opposes Rule 27.5.1 particularly because it is difficult to understand. It should be redrafted to make it clear for the community how it might apply to their properties.

Summary of Submission Insert new policy as follows:

Policy xxx

Avoid, remedy or mitigate reverse sensitivity effects on infrastructure.

Explanation: Subdivision and subsequent land use and development can increase the potential for reverse sensitivity effects on infrastructure. Infrastructure and network utility operators provide an important essential service to the Queenstown Lakes District and Wider National Networks. To ensure the continuation of this essential service the presence and function of the infrastructure should be recognised and careful consideration given to preventing the establishment and expansion of sensitive activities located in the vicinity of infrastructure.

Summary of Submission Rules for Utilities; and Buildings, Structures and Earthworks within National Grid Corridors (excluding Flood Protection Rules 30.4.18 – 30.4.21 and National Grid Rules 30.4.10))

Spark seeks to amend the Utilities rule framework to better align with the objectives and policies.

Spark seeks a new rule framework (as outlined in the submission) that appropriately manages the adverse effects of utilities but is more enabling.

The rules of the proposed plan do not reasonably provide for standard sizes and forms of equipment commonly in use throughout the country. In addition, the parameters such as antenna dimensions and the failure to provide for key parts of telecommunication networks means that a number of un-necessary resource consents would be required.

Spark seeks to insert matters of control and discretion that provide clear guidance to decision makers.

~~".....Energy efficiency and conservation go hand in hand with renewable energy. Conserving the use of energy together with the generation of renewable energy will be vital in responding to the challenges of providing enough energy to meet future energy".....The benefits of solar energy may be realised through site design methods which promote solar efficient design, in addition to the inclusion of solar photovoltaic panels and solar hot water heating systems within buildings. Sustainable community design is encouraged by allowing greater density of development within Urban Growth Boundaries and by providing limits to the extent of development by the establishment of Urban Growth boundaries. Sustainable building forms which reduce energy demand and minimise heating costs are encouraged, including use of the Homestar™ rating system for residential buildings and Green Star tool for commercial buildings."~~

Position:	Support		
Summary of Submission	<p>Support in part. PowerNet seeks that the following changes be made to the Chapter purpose:</p> <p><u>Utilities are essential to the servicing and functioning of the District and have national, regional and local benefits. Utilities have the purpose to provide a service to the public and are typically provided by a network utility operator. Due to the importance of utilities in providing essential services to the community, their often high capital cost to establish, and their long life expectancy; the need for the future establishment and on-going functioning, maintenance and upgrading of utilities is recognised. In addition, some utilities have specific locational needs that need to be accommodated for their operation. The co-location of utilities may achieve efficiencies in design and operation, reduce capital investment costs and also minimise amenity and environmental effects. The ability to co-locate compatible uses should be considered for all utility proposals.</u></p>		

~~While it is recognised while that utilities can have national, regional and local benefits, they can also have adverse effects on the environment surrounding land uses, some of which have been established long before the network utility.~~ The sustainable management of natural and physical resources requires a balance between the effects of different land uses. However, it is also necessary that essential utilities are protected, where possible, from further encroachment by incompatible activities which may be subject to reverse sensitivity effects. This chapter therefore also addresses requirements for sensitive uses and habitable buildings located near to utilities.

Insert New Provision – Critical Electricity Lines – Land Use

Critical Electricity Lines – Land Use

NOTE: The following provisions apply district wide in addition to any other provisions in this Plan applicable to the same areas or site. Critical Electricity Lines (CEL's) and substations are the key components of the electricity network in the Queenstown Lakes District. To provide a resilient electricity network the use and development of CEL's and substations must be sustainable, secure

and efficient. CEL's and substations can be vulnerable to inappropriate subdivision or building location to the extent that they can restrict access and affect the ability to maintain the CEL's (lines,

cables and support structures). Trees planted too close to lines or cables can disrupt supply. CEL's

are, or have the potential to be, critical to the quality, reliability and security of electricity supply throughout the district or region. These lines contribute to the social and economic wellbeing and

health and safety of the district or region and are lines that:

• Supply essential public services such as the hospital, civil defence facilities or Lifeline sites;

or

• Supply large (1MW or more) industrial or commercial electricity consumers; or

• Supply 1000 or more consumers; or

• Are difficult to replace with an alternative electricity supply if they are compromised.

The locations of CEL's and designated substations are identified in the planning maps of the District Plan.

The following activities are permitted activities:

1. Within 10m of a CEL or the designation boundary of a substation:

i. Any building or structure that does not require building consent; or

ii. Alteration of any building that does not exceed outside the envelope or footprint of the existing building; or

iii. Earthworks that:

a. Are not directly above an underground cable(s); and

b. Do not result in a reduction of existing ground clearance distances from overhead lines below the minimums prescribed in the New Zealand Code of Practice 34:2001 (NZECP 34:2001); and

c. Are in accordance with NZECP 34:2001.

2. Within 20m of a CEL or the designated boundary of a substation:
i. Planting of trees other than shelterbelts, production forestry or commercial horticultural operations.
 3. Activities that fail to meet the standards in (1) and (2) above, provided that prior to the commencement of any works:
i. Written notification has been provided to the Council; and
ii. The proposed activity is being carried out in accordance with the Electricity Act 1992 and associated regulations (NZECP 34:2001, the Electricity (Hazards from Trees) Regulations 2003 (SR 2003/375), and the Electricity (Safety) Regulations 2010);
OR
3.1 The proposed activity is being carried out by a network utility operator or territorial authority in accordance with NZECP 34:2001.
Note:
Specified distances from CEL's are to be measured from a point directly below the centreline of the line or cluster of lines, as shown in the Critical Electricity Line Definition.

Activities that do not meet the requirements for permitted activities, require resource consent as a

i. the safe and efficient operation and maintenance of the electricity supply network, including:
a. The use, design and location of buildings; and
b. The mature size, growth rate, location, and fall zone of any associated tree planting, including landscape planting and shelterbelts; and
c. Compliance with NZECP 34:2001; and
d. Effects on public health and safety; and
e. Effects on access to CEL's, designated substations and associated infrastructure for maintenance purposes.

Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	Support with amendments. Amend opening paragraph to: Utilities have the purpose to provide a service to the public and are typically provided by a network utility operator. Due to the importance of utilities in providing essential services to the community, their often high capital cost to establish, and their long life expectancy; the need for the establishment and on-going <u>development, operation, functioning, maintenance and upgrading of regionally and nationally significant utilities</u> is recognized <u>and provided for</u> . In addition, some utilities have specific locational, <u>technical and operational requirements</u> needs that need to be accommodated for their operation. It is recognised while utilities can have national, regional and local benefits, they can also have adverse effects on surrounding land uses, some of which have been established long before the network utility. The sustainable management of natural and physical resources requires a balance between the effects of different land uses. However, it is also necessary that <u>regionally significant essential utilities are protected from development that could adversely affect (including through, where possible, from further encroachment by incompatible activities which may be subject to reverse sensitivity) effects the ability of that infrastructure to be accessed,</u>		

operated, maintained, upgraded and developed. This chapter therefore also addresses requirements for sensitive uses and habitable buildings located near to utilities.

Summary of Submission Support with amendments. Replace Policy 30.2.6.4 with the following objective and policy:

New objective:

To avoid the establishment of new land use activities that could adversely affect (including through reverse sensitivity) the safe, efficient or effective operation, maintenance, upgrading and development of the National Grid.

New policy:

To manage the effects of subdivision, development and land use on the safe, effective and efficient operation, maintenance, upgrading and development of the National Grid by ensuring that:

a. Areas are identified in the Plan to establish safe buffer distances for managing subdivision and land use development near the National Grid;
b. Sensitive activities and large-scale structures are excluded from establishing within National Grid Yards and are appropriately managed around substations;
c. Subdivision is managed around the National Grid to avoid subsequent land use from restricting the operation, maintenance, upgrading and development of the National Grid; and
d. Changes to existing activities within a National Grid Yard and around National Grid substations do not further restrict the operation, maintenance, upgrading and development of the National Grid.

~~Provide for the sustainable, secure and efficient use and development of the electricity transmission network, including within the transmission line corridor, and to protect activities from the adverse effects of the electricity transmission network, including by:~~

~~• Controlling the proximity of buildings, structures and vegetation to existing transmission corridors~~

- Discouraging sensitive activities from locating within or near to the electricity transmission National Grid Yard to minimise potential reverse sensitivity effects on the transmission network
- Managing subdivision within or near to electricity transmission corridors to achieve the outcomes of this policy to facilitate good amenity and urban design outcomes
- Not compromising the operation or maintenance options or, to the extent practicable, the carrying out of routine and planned upgrade works.

Rule 30.4.10
Buildings, Structures and Sensitive Activities in National Grid Yards:
(a) Under the National Grid Conductors (wires), on all sites within any part of the National Grid Yard any buildings and structures must:
(i) If they are for a sensitive activity, not involve an increase in the building height or footprint where alterations and additions to existing buildings occur; or
(ii) Be a fence less than 2.5m high; or
(iii) Be network utilities within a transport corridor or any part of electricity infrastructure that connects to the National Grid; or
(iv) Be an uninhabitable farm building or structure for farming activities (excluding milking/dairy sheds (but not associated ancillary structures and yards), protective canopies, or factory farming buildings); or
(v) Be artificial crop protection structures and crop support structures excluding a commercial greenhouse and protective canopies.

(b) All buildings or structures permitted by a) must comply with at least one of the following conditions:
(i) A minimum vertical clearance of 10m below the lowest point of the conductor associated with National Grid lines; or
(ii) Demonstrate that safe electrical clearance distances required by NZECP34:2001 are maintained under all National Grid line operating conditions.
(c) Buildings and structures shall be at least 12m from a National Grid support structure unless it is a:
(i) Network Utility within a transport corridor or any part of electricity infrastructure that connects to the National Grid.
(ii) Fence less than 2.5m in height and more than 5m from the nearest support structure.
(iii) Artificial crop protection structure or crop support structure between 8 metres and 12 metres from a pole support structure that:
a. Meet the requirements of NZECP34:2001;
b. are no more than 2.5m in height;
c. are removable or temporary to allow a clear working space 12 metres from the pole where necessary for maintenance and emergency repair purposes, and
d. allow all weather access to the pole and a sufficient area for maintenance equipment, including a crane; and
(iv) Artificial crop protection structure or crop support structure located within 12 metres of a tower support structure if they meet the requirements of clause 2.4.1 of NZECP34:2001.

Summary of Submission

Replace Rule 30.5.10 with the following non-complying Rule:

Rule 30.5.10

Buildings, Structures and Sensitive Activities within the National Grid Yard are non-complying:

- a) Any building or addition to a building for a sensitive activity.
- b) Any change of use to a sensitive activity or the establishment of a new sensitive activity.
- c) Dairy/milking sheds or buildings (excluding associated ancillary structures and yards) factory farm buildings, protective canopies, and commercial greenhouses.
- d) Hazardous facility.
- e) Any building or structure not permitted by Rule 30.4.10.

Add a notification statement to the new non-complying activity status:

Where an activity requires resource consent solely because it is within a National Grid Corridor, National Grid Yard or around a National Grid substation then the application need not be publicly notified and need not be served on any affected party other than Transpower New Zealand Limited.

~~Buildings and Structures within the National Grid Yard being:~~

~~30.5.10.1 A non-conductive fence located 5m or more from any National Grid Support Structure and no more than 2.5m in height.~~

~~30.5.10.2 Any utility within a transport corridor or any part of electricity infrastructure that connects to the National Grid.~~

~~30.5.10.3 Any new non-habitable building less than 2.5m high and 10m² in floor area.~~

~~30.5.10.4 Any non-habitable building or structure used for agricultural activities provided that they are:~~

- ~~a. less than 2.5m high~~
- ~~b. Located at least 12m from a National Grid Support Structure~~
- ~~c. Not a milking shed/dairy shed (excluding the stockyards and ancillary platforms), or a commercial glasshouse.~~

~~30.5.10.5 Alterations to existing buildings that do not alter the building envelope.~~

Summary of Submission

Support with amendments.

Replace Rules 30.4.11 and 30.4.12 with the following Rules:

Rule 30.4.11

The construction and maintenance of the following network utilities are a permitted activity provided they meet the following standards:

- a) Any new electricity lines and associated transformers shall be limited to a voltage up to and including 110kV.
- b) Maintenance of any existing line.
- c) Any trimming or removal of any vegetation that is required to maintain safe separation distances or the ongoing efficient operation of the line.
- d) In the case of poles and towers, these shall comply with a maximum height of:
 - i. 20 metres in Rural or Industrial Zones.
 - ii. 12 metres in any Residential Zone.

Rule 30.4.12

Any activity that does not comply with the standards specified in Rule 30.4.11 is a controlled

activity.

A conductor line, or support structure for overhead lines, to convey electricity (at a voltage of equal to or less than 110kV at a capacity of equal to or less than 100MVA); or overhead lines for any other purpose including telecommunications.

Control is reserved to all of the following:

- Location
- Route
- Height
- Appearance, scale and visual effects
- Where a site is subject to any natural hazard and the proposal results in an increase in gross floor area: an assessment by a suitably qualified person is provided that addresses the nature and degree of risk the hazard(s) pose to people and property, whether the proposal will alter the risk to any site, and the extent to which such risk can be avoided or sufficiently mitigated.

Summary of Submission	<p>Re-instatement of the avenue of Spruce trees as a protected feature in Part 5, Section 32.8 – Schedule of Protected Trees - District Wide.</p> <p>This avenue of spruce trees is listed in Appendix 3 to the Operative District Plan under the Inventory of Protected Features, Arrowtown and Environs, Heritage Trees, Ref. no. 275 and Map ref 26. The avenue is an integral part of the historic setting of the Ayreburn homestead and is a</p>		

key heritage feature in the Wakatipu Basin. The avenue is unique to the Queenstown Lakes District. We understand the spruce trees are over 100 years old. There is no other avenue of spruce trees in the Wakatipu Basin or in the District. We consider the avenue is a unique heritage and botanical feature nationally.

Summary of Submission	The council should consult with landowners before giving trees in the Arrowtown Residential Historic Management Zone protection under the category 'character trees'. The council needs to recognise that in some instances there are trees which are in inappropriate locations and discussion with landowners will highlight these. The objective should be amended to include a provision for consultation with affected parties.

32.5.1.6 Add new – Whether the removal of a tree of trees will potentially have an adverse effect on nearby trees to be retained.

32.5.1.6 Change to – Potential effect on the health and structural stability of the tree or hedgerow both in the short and long term.

32.5.1.7 Change to – Whether arboricultural industry recognised and accepted best practice will be adhered to.

32.5.1.8 Change to – Whether any viable and practicable alternatives are available.

Summary of Submission	The plan needs to have a clear statement under Purpose which relates to enhancement of vegetation and biodiversity with supporting objectives and policies. That is increasing our indigenous vegetation and biodiversity both on private and public lands. Recommendation: The Plan should seek to reduce any further loss of indigenous vegetation. This should be stated under Purpose. Policy and objectives to such that if loss is unavoidable an equivalent “offsett” planting should be required either on the same site or elsewhere.

Summary of Submission Delete and Replace as follows:

~~Where the adverse effects of an activity on indigenous biodiversity cannot be avoided, remedied or mitigated, consideration will be given to whether there has been any compensation or biodiversity offset proposed and the extent to which any offset will result in a net indigenous biodiversity gain~~

If the ecosystem or habitat cannot be avoided, adverse effects are managed by avoiding significant adverse effects. Where adverse effects are not significant:

(a) they are avoided in the first instance;

(b) where they cannot be avoided, they are remedied;

(c) where they cannot be remedied they are mitigated; and

(d) Where residual adverse effects remain, and cannot be mitigated they are offset.

---------------------	---------	-------------------	--

Position:	Oppose
------------------	--------

Summary of Submission	This is an assessment matter. This matter is likely to cumulatively exacerbate biodiversity loss by reducing the area of habitat available and over time may lead to extirpation of species from areas.

Point Number	373.18	Provision:	26-33 Indigenous Vegetation and Biodiversity
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	Alter the structure of the indigenous vegetation and biodiversity provisions to ensure that these provisions are clear, easy for the community to use, and ensure that appropriate protection is applied when it comes to areas of significant indigenous vegetation and habitats of indigenous fauna.		
Point Number	373.19	Provision:	26-33 Indigenous Vegetation and Biodiversity > 27-33.1 Purpose
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	<p>Amend the wording of 33.1 Purpose (paragraph 4) as follows:</p> <p><i>The limited removal of indigenous vegetation not determined to be significant is permitted, with discretion applied through the resource consent process to ensure that indigenous vegetation clearance activities exceeding the permitted limits protect, maintain or enhance indigenous biodiversity values. Where the removal of indigenous vegetation cannot be avoided or mitigated and would diminish the District's indigenous biodiversity values, opportunities for the enhancement of other areas are encouraged to offset the adverse effects of the loss of those indigenous biodiversity values.</i></p> <p><u>Where indigenous vegetation in an area described as a Significant Natural Area in the district plan, or is determined to be an Significant Natural Area through a site specific ecological assessment, then any removal of indigenous vegetation required will only be allowed in exceptional circumstances, and where through a resource consent process the adverse effects of the activity are demonstrated as being avoided, remedied or mitigated. Biodiversity off-sets will be required to manage any residual adverse effects that cannot otherwise be mitigated.</u></p> <p>Or wording of a similar effect.</p>

Position:	Other - Please clearly indicate your position in your submission below		

Summary of Submission	<p>Amend Objective 33.2.1 as follows:</p> <p>Protect, maintain and enhance indigenous biodiversity. Existing indigenous biodiversity values are protected, maintained or enhanced</p>		
Point Number	373.21	Provision:	26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 29-33.2.1 Objective 1 > 30-33.2.1.1
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	Delete Policy 33.2.1.1 and add the intent of this policy to wording to be included in a new Policy 33.2.2.1 under Objective 33.2.2.		
Point Number	373.22	Provision:	26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 29-33.2.1 Objective 1 > 31-33.2.1.2
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	<p>Support in part for Policy 33.2.1.2.</p> <p>It is recommended that this policy is moved and combined with policies under Objective 33.2.2. The presence of threatened species either nationally or at a district level is generally a factor in determining a site to be significant under the significance criteria (refer to policy 33.2.1.9b). Therefore it is recommended to replace this policy with a new policy that refers to the criteria for determining ecological significance in line with that detailed in Policy 33.2.1.9 as well as the list of threatened species in section 33.7</p> <p>.</p>		
Point Number	373.23	Provision:	26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 29-33.2.1 Objective 1 > 32-33.2.1.3

Summary of Submission	<p>Amend Policy 33.2.1.4 as follows:</p> <p><u>Recognise Kai Tahu as kaitiaki and provide for Kai Tahu values and principles in providing for the maintenance of indigenous species and habitats.</u> and take into account the values of tangata whenua and kaitiakitanga.</p>		
Point Number	373.25	Provision:	26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 29-33.2.1 Objective 1 > 34-33.2.1.5
Position:	Oppose		
Summary of Submission	<p>Policy 33.2.1.5 is opposed.</p> <p>As the rules that give effect to these policies apply to all zones in the district it is unclear why a policy specific to rural land uses is required.</p> <p>The adverse effects of any indigenous vegetation clearance may be balanced against the benefits of a land use activity as a matter of course in making a decision under section 104 RMA. Given that, this policy adds no further value and is not reflected in the rules for this chapter.</p>

------------------	------------

Summary of Submission	Amend first paragraph as follows:
------------------------------	-----------------------------------

The District contains a diverse range of habitats that support indigenous plants and animals, including species that are endemic to the district, threatened either nationally or regionally. Distinctive habitats include ~~comprising~~ forests, shrubland, herb fields, tussock grasslands, wetlands, lake and river margins. Indigenous biodiversity is also an important component of ecosystem services and the District's landscapes.

Point Number	706.67	Provision:	26-33 Indigenous Vegetation and Biodiversity > 27-33.1 Purpose
---------------------	--------	-------------------	--

Position:	Not Stated
------------------	------------

Summary of Submission	Amend third paragraph as follows:
------------------------------	-----------------------------------

Significant adverse effects resulting from removal clearance of indigenous vegetation should be avoided. Where the adverse effects are not significant and cannot be avoided, remedied or mitigated and would diminish the District's indigenous biodiversity values, opportunities for the protection, restoration and enhancement of other similar habitats areas are encouraged to offset the adverse effects of clearance and ensure no net the loss and preferably a net gain of those indigenous biodiversity values. Biodiversity offsetting should not be applied to justify impacts on vulnerable and irreplaceable biodiversity values or biodiversity values which cannot be offset. _

Point Number	706.68	Provision:	26-33 Indigenous Vegetation and Biodiversity > 27-33.1 Purpose
---------------------	--------	-------------------	--

Position:	Not Stated
------------------	------------

Summary of Submission	Amend final paragraph as follows:
------------------------------	-----------------------------------

The District's lowlands comprising the lower slopes of mountain ranges and valley floors have been modified by urban growth, farming activities and rural residential development. Much of the indigenous vegetation habitat has been removed, or modified, and the remaining remnants are likely to be vulnerable and important to retain. These areas are identified in the Land Environments of New Zealand Threatened Environment Classification as either acutely or chronically threatened environments, having less than 20% indigenous vegetation remaining.

Point Number	706.84	Provision:	26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives

Position: Not Stated

Summary of Submission Add the following new policy:

Significant adverse effects of the use and development on habitats of indigenous birds in wetlands, beds of rivers and lakes and their margins for breeding, roosting, feeding and migration are avoided and other effects are avoided, remedied or mitigated.

Point Number 706.85 **Provision:** 26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 43-33.2.3 Objective 3

Position: Not Stated

Summary of Submission Amend to read:

Ensure the ~~efficient use~~ management and development of land, including ski-field development, farming activities and infrastructure improvements, ~~does not reduce the District's indigenous biodiversity values.~~ Or To maintain and enhance indigenous biodiversity when undertaking land management and development activities.

Point Number 706.86 **Provision:** 26-33 Indigenous Vegetation and Biodiversity > 28-33.2 Objectives and Policies > 43-33.2.3 Objective 3

Position: Not Stated

Summary of Submission Amend the policies 33.2.3.1 - 33.2.3.7 as set out in other submission points by Forest and Bird and make these assessment matters.

Point Number	755.18	Provision:	26-33 Indigenous Vegetation and Biodiversity
Position:	Not Stated		
Summary of Submission	Chapter has no specific acknowledgment of aquatic biodiversity or its protection. This chapter heading is misleading and should be revisited. Vegetation is “biodiversity”.		
<hr/>			
Point Number	755.19	Provision:	26-33 Indigenous Vegetation and Biodiversity > 27-33.1 Purpose
Position:	Not Stated		
Summary of Submission	“Purpose” states “Much of the indigenous vegetation habitat has been removed” - in fact removal will also be a consequence for all of the very many other organisms dependent on vegetation. Also what about aquatic environments? Lakes, rivers streams, wetlands and aquifers are all rich habitats for biodiversity –but are not mentioned in the Purpose.

Position:	Other - Please clearly indicate your position in your submission below		

Summary of Submission	Support the intent of the objective and all of the many policies in this chapter but suggest that some deficiencies include the absence of clear definitions of the animal size cut-off for any quantitative assessments of biodiversity, the absence of mention of any metrics of biodiversity which might help determine whether objectives are being achieved, or capable of being achieved, the absence of specific mention in objectives or policies of biodiversity in aquatic ecosystems, and in some cases referring to vegetation as if it is all of the biodiversity in the habitats mentioned

Position:	Not Stated		
Summary of Submission	Land Environments New Zealand Classification is not an appropriate tool to be relied on in the proposed plan. Land to which this policy applies should be identified as possessing Indigenous Vegetation of significance for protection. Specific account should be given to the current and historical land uses on the site in the policy framework.		

Point Number	784.15	Provision:	26-33 Indigenous Vegetation and Biodiversity > 54-33.3 Other Provisions and Rules > 56-33.3.2 Clarification
Position:	Not Stated		
Summary of Submission	33.3.2 if the relief sought by JBIL in relation to the Land Environments New Zealand classification (sought under 33.2.3.5) is granted a consequential amendment of clause 33.3.2.6 will also be required.

Point Number	386.2	Provision:	174-34 Wilding Exotic Trees > 181-34.4 Rule – Planting of wilding exotic trees > 183-34.4.2 Exemption
Position:	Oppose		
Summary of Submission	Include an exemption in section 34.4.2 to allow the listed tree species to be planted if the land manager can show they will employ management techniques to restrict the spread of trees from their plantations onto their neighbouring properties. This may include planting a buffer of non-spreading trees, removing wilding trees within a specified radius of the site, or working with the neighbouring properties to develop a sustainable management strategy.

Point Number	386.3	Provision:	174-34 Wilding Exotic Trees
Position:	Oppose		
Summary of Submission	Oppose overall approach in Chapter 34. Contend that the spread of wilding forests is not an environmental problem but a land management issue with potential economic and environmental benefits if managed intelligently. We would like our council to take a more holistic and sustainable approach recognising that these tree species are now an established part of our wild ecosystem and also part of our cultural heritage. Thus the council must ensure that there are no barriers to the development of a sustainable industry using these forest resources.

Summary of Submission There are a number of cultivars of the Hawthorn laevegata species that are sterile and pose no risk in terms of wilding spread. In the submitters opinion, sterile cultivars should not be captured by Provision 34.4.1.

Requests that item (l) of the proposed Provision 34.4.1 is re-worded to read:
(l) Hawthorn, except sterile cultivars such as Crataegus laevegata “Pauls Scarlet”, Crataegus laevegata “Plena” and Crataegus laevegata “Rosea flora plena”.

Requests that the list of species and genera relating to proposed Provision 34.4.1 is investigated by an expert to ensure that other useful sterile cultivars are not needlessly prohibited from being planted in the District.

Summary of Submission

- Delete all provisions (including objectives, policies, rules, assessment criteria and other methods and reasons) on removal, re-siting, and relocation of buildings in the Proposed Plan, the definitions section, and elsewhere.
- Rewrite the proposed plan, and its policies and objectives, rules, methods and reasons to reflect the reasons for this submission.

- Recognise in the objectives, policies and rules and methods of the plan the need to provide for the coordination between Building Act and Resource Management Act, to avoid regulatory duplication.

- Replace the policy provisions relating to relocated dwellings and buildings (either by rewriting the plan, or alternatively, by deleting the relevant sections and replacing the provisions in each section or zone of the plan, as is appropriate) with objectives, policies, rules, assessment criteria, methods, reasons and other provisions which expressly provide for relocation of buildings as "permitted activities" in all zones/areas, so as to achieve performance standards no more restrictive than provided for in the paragraph below.

- Provide for the relocation of dwellings and buildings subject to the following performance standards/conditions (or to same or similar effect):
Relocation of buildings
Relocated buildings are permitted where the following matters can be satisfied:
 - a) Any relocated building can comply with the relevant standards for Permitted Activities in the District Plan;
 - b) Any relocated dwelling must have been previously designed built and used as a dwelling;
 - c) A building inspection report shall accompany the building consent for the building/dwelling. The report is to identify all reinstatement work required to the exterior of the building/dwelling; and
 - d) The building shall be located on permanent foundations approved by building consent, no later than [2] months of the building being moved to the site.
 - e) All work required to reinstate the exterior of any relocated building/dwelling, including the siting of the building/dwelling on permanent foundations, shall be completed within 12 months of the building being delivered to the site.

- As a default rule, in the event that relocation of a buildings/dwelling is not a permitted activity (as provided for in the two paragraphs above) due to non-compliance with performance standards, provide for relocation of dwellings and buildings no more restrictively than a restricted discretionary activity (provided that such application be expressly provided for on a non-notified, non-service basis) subject to the following assessment criteria (or to the same or similar effect):
Restricted Discretionary Activity
(on a non-notified, non-service basis)

- Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for resource consent:
 - i) Proposed landscaping;
 - ii) the proposed timetable for completion of the work required to reinstate the exterior of the building and connections to services;

iii) the appearance of the building following reinstatement

- Delete any provision for a performance bond or any restrictive covenants for the removal, re-siting, and relocation of dwellings and buildings.
- Restrict (as a discretionary activity rule) the use of restrictive covenants for the removal, re-siting, and relocation of dwellings and buildings.
- Make any further or consequential amendments to give effect to this submission, including such amendments as required to the provisions, definitions, other matters, rules, objectives, policies and reasons of the proposed plan to give appropriate recognition to the positive effects of removal, re-siting, and relocation of dwellings and buildings and dwellings, in accordance with the reasons for this submission, and the relief sought as a whole.

Summary of Submission	Landscape is not only visual. Add noise regulations: On the lakes and rivers near habitations, speed limits must be reduced to a speed so that engines can't be heard from the shore. Sundays should be chainsaw, lawnmowers and loud machinery free. Banning chemical pesticides and fertilisers use or at least restrict it significantly.

Summary of Submission

Support in part: Support the gist of the first paragraph but with amendments to terminology for consistency with this chapter and other parts of the proposed plan and the terminology used in the standards cited. Term "nuisance" only used here is inappropriate in RMA context.

The decision required is :

In the first sentence delete 'nuisance and give rise'. In the last sentence, replace 'duration and timing' with 'duration, or timing'.

For the following reasons.

Term 'nuisance' is used with the term 'adverse effects'. Latter is consistent with RMA terminology whereas the term 'nuisance' relates to civil torts. Its ordinary usage is not mentioned in the RMA and the basis for nuisance is not the 'sustainable management ethos of the RMA. The word 'and used' in the phrase 'duration and timing of noise' implies it and the preceding terms must be or should be interpreted conjunctively rather than disjunctively of as alternative elements and the ambiguity can be avoided by avoiding the word 'and'.

Summary of Submission

Our Submission is: Support the gist of the second paragraph but with amendments to terminology for consistency with this chapter and other parts of the proposed plan and the terminology used in the standards. Reference to 'noise levels' in phrase 'prescription of noise levels' is inappropriate.

The Proposal is supported in part but with the following amendments:

Replace 'noise levels' with 'noise limits'. If the words are retained add 'sets upper limits for'

before 'noise levels for each zone'.

Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the Proposal, or consequential amendments to this section, as a result of decisions about other parts of the Proposal.

For the following reasons.

In the phrase 'prescription of noise levels' the term 'levels' is wrong as the plan sets 'noise limits' for each zone, not a prescribed 'level' for each zone

Summary of Submission

Support in part.

Support the gist of the fourth paragraph but with amendments to terminology for consistency with this chapter and other parts of the proposed plan and the terminology used in other statutes. The phrase 'can be controlled through' is inappropriate as the statute is in force and applied.

Recommend the following amendment:

Replace 'can be controlled through' with 'is controlled under'.

Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the Proposal, or consequential amendments to this section, as a result of decisions about other parts of the Proposal.

For the following reasons.

The Civil Aviation Act 1990 provisions for control of aircraft noise have been in effect for many years and it is misleading to imply they 'can' control noise rather than actually do control aircraft noise, in a manner outside Council jurisdiction.

Point Number	649.7	Provision:	245-36 Noise > 247-36.2 Objectives and Policies > 248-36.2.1Objective 1

Summary of Submission

Reasonable provisions consistent with sustainable management for the district.

For the following reasons.

Identifies noise as a potential adverse effect on people and communities and a statutory responsibility under RMA for Council to control.

Point Number	649.8	Provision:	245-36 Noise > 249-36.3 Other
---------------------	-------	-------------------	-------------------------------

Position: Support

Summary of Submission Support the gist of the clarification and 36.3.2.3 about how noise is to be measured and assessed, including by reference to NZ standards NZS 6801:2008 and NZS6802:2008 and by other New Zealand standards where they have been referenced; 36.3.2.4 prescription of noise standards in tables: 36.3.2.5 exempt activities listed; 36.3.2.6 specific provisions for aircraft noise.

For the following reasons.

Basis for measurement and assessment of noise is latest editions of appropriate New Zealand Standards and tabulation of noise limits in rules is a sensible method of layout. Exemptions for table 1 activities are reasonable.

Point Number	649.9	Provision:	245-36 Noise > 252-36.4Rules - Activities

Summary of Submission Support the assessment locations specified as 'at any point within the notional boundary' where appropriate and 'at 'any point within' other specified areas. Support the time frames specified for application of noise limits and support the prescription of noise limits using the LAeq(t) descriptor and the specification of 15 minute integration times. Support the additional specification of LAFmax numerical limits at night time. Support numerical noise limits proposed However in 36.5.7.2 night time noise limits have been stated as L10 and Lmax noise limits rather than LAeq(t) and LAFmax noise limits consistent with elsewhere in the table.

Support in part with the following amendment:

In 36.5.7.2 for the time frame 2200h to 0800h replace the unit dBA with dB and replace the descriptor 'L10' with 'LAeq(15min)', and replace 'Lmax' with 'LAFmax'

Point Number	649.11	Provision:	245-36 Noise > 260-36.5 Rules- Standards
---------------------	--------	-------------------	--

Position: Not Stated

Summary of Submission Support in general specific noise limits for specified activities but with amendments to 36.5.11 Frost fans.

Support in part with the following amendment:

In Rule 36.5.11, replace '85 dB LAFmax' with '55 LAeq(15 min)'.

For the following reasons:

Noise limits for telecommunications appliances, wind farms , audible bird scaring devices, helicopters, fixed wing aircraft, vibration construction noise, commercial motorised craft and Jacks Point state highway noise are reasonable and appropriate levels of protection for people and communities. However frost fan rule noise limit is inadequate to protect people from adverse noise effects as a district-wide noise rule (notwithstanding the Gibbston Character Zone) . Lmax limit alone fails to account for increased annoyance where there are special audible characteristics present that should be penalised by an adjustment as prescribed in NZS 6802:2008.

Point Number	649.12	Provision:	245-36 Noise > 278-36.6 Airport Noise
Position:	Support		
Summary of Submission	Support the gist of these provisions as reasonable and appropriate. Support the compliance method. Reason for this: Provisions are necessary for protection of people in habitable buildings in the vicinity of airports from aircraft noise.		

Point Number	649.13	Provision:	245-36 Noise > 283-36.8 Acoustic Measurement and Assessment
Position:	Support		
Summary of Submission	Support provisions as proven workability and reasonable standards. For the following reasons. Provisions are workable for the special circumstances of this district with reasonable test methods and noise limits.
